**PAUSE FOR REFLECTION**

Regional Vice-Chairman Betsy Burke

Are you tired of reality shows on TV? I certainly am not enamored of them. I haven't been able to care about who survives the trials of trying to land a false millionaire, pick a potential mate from a group of masked men, become the latest pop or country-western star, do the stupidest feat, or eat the most revolting things imaginable. However, Mensa has become part of this world (sort of)! On June 9, Fox TV will run a show that tests the nation's intelligence, and Mensa helped with the production.

Fox asked Mensa to help norm the test. Various people around the country were tested with one of Mensa's qualifying tests and a Fox TV test. The Mensa scores were then used to norm the Fox Test. Mid-Hudson Mensa participated in the tests, as did Boston Mensa. I was amazed at how this worked, especially the speed with which everything had to be set up and organized. You might enjoy watching this show and seeing if you qualify for Mensa!

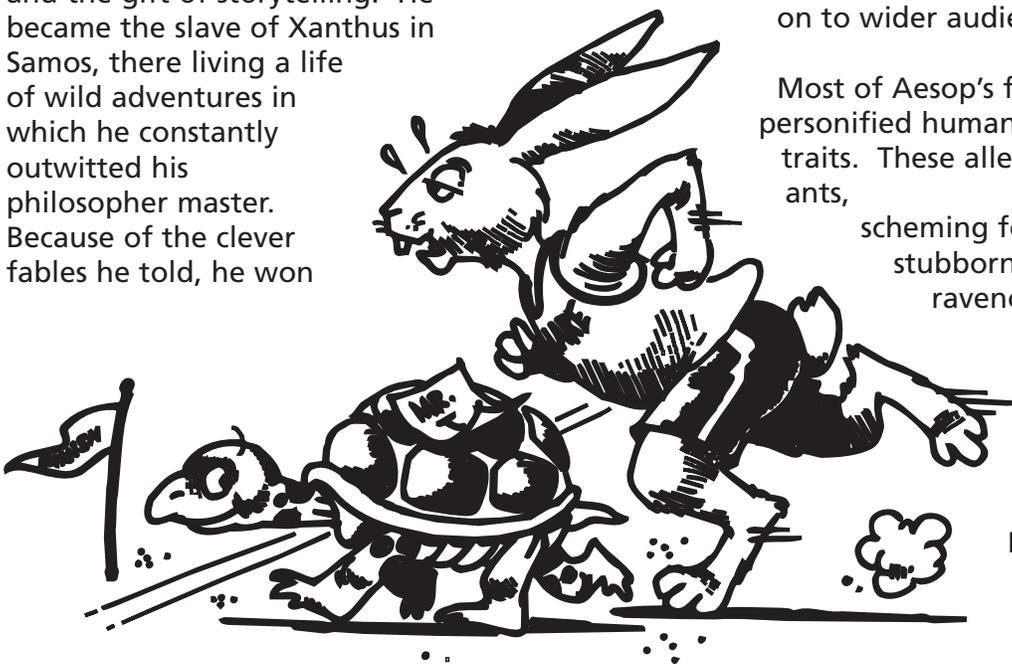

This might be my last column as your RVC, as the results of the voting will be known this month. I'd like to thank everyone who helped me, especially the editors and loc-secs. Thanks for all you do for this organization. I hope to see many of you at the AG.

I didn't write a column last month due to a personal health problem. I went in for my annual checkup and discovered that I needed out-patient surgery. Unfortunately it ended up being more serious than anticipated, and I had to be admitted to the hospital. (Never let yourself be admitted to a hospital when someone who works there has the same name - this caused all sorts of funny problems when relatives tried to locate me and my clothing disappeared!) Thankfully, all tumors turned out to be benign, but it was a major scare and I just haven't been able to "bounce back" yet. I missed Greater New York's RG because of this but I heard it was a successful and enjoyable gathering.

AESOP AND HIS FABLES

The name Aesop is synonymous with fables. Most adults have ingrained in their minds from childhood the lessons from Aesop's famous stories such as "The Tortoise and the Hare", "The Boy Who Cried Wolf", "The Goose and the Golden Egg", and "The Fox and the Grapes." Few people, however, remember much else about the man except that he lived in Ancient Greece. Perhaps that's because very little is actually known about Aesop. His biography is a mixture of conjecture, myth, and legend.

Most biographies of Aesop say that he lived from 620 - 564 B.C. but no one is quite sure that Aesop even existed. Credible 5th-century sources such as Herodotus and Aristophanes admit uncertainty but characterize him as a sixth-century slave of marvelous wisdom. Most accounts say that he was born in Phrygia, although others claim that he was born in Sardis; the capital of Lydia (in modern day Turkey), or Samos; a Greek island, or Mesembria; an ancient colony in Thrace. The earliest biography we have of him is the Life of Aesop, which in its original version had the longer title The Book of Xanthus the Philosopher and His Slave Aesop. According to this manuscript, the great fabulist was born deformed, ugly, and mute. Because of his kindness in helping a priestess of the goddess Isis, Aesop was given the power of speech and the gift of storytelling. He became the slave of Xanthus in Samos, there living a life of wild adventures in which he constantly outwitted his philosopher master. Because of the clever fables he told, he won

the admiration of many wise men and eventually his freedom.

As a free man, Aesop traveled through many lands, winning audiences both among common folk and the learned with his wise tales. He settled in Sardis, the capital of Lydia, to serve the king Croesus, a patron of philosophers and sages. There, he conversed with famed minds such as Solon and Thales but outshone them all in the eyes of the monarch. Aesop was an administrator and ambassador under Croesus, visiting many of the small republics of Greece, as well as the mightier city-states such as Corinth and Athens. He lectured to the citizens of these states, counseling them through his fables.

There are more than 300 fables attributed to Aesop but he did not invent all of them, and he probably did not even create most of them. Many of them were already circulating long before his birth. For instance, the fable of "The Hawk and the Nightingale" appears in the writings of Hesiod (8th century B.C.), and "The Fox and the Eagle" by Archilochus (760 - 670 B.C.). The ancient Greeks were inveterate storytellers, and Aesop probably picked up many tales in his travels and passed them along from city to city. Some of Aesop's Fables can be traced to much later times, to monks of the Middle Ages. But Aesop is considered the father of fables because he collected so many of them, told them in a distinctive style, and passed them on to wider audiences.

Most of Aesop's fables featured animals who personified humans with distinctive character traits. These allegories have hard-working ants,

scheming foxes, proud peacocks, stubborn mules, imperious lions, ravenous wolves, and a host of other animals, birds, and insects. But many of these creatures have virtues and vices which turn up in different tales, or even in the same story, as in the "The Frogs and the Well" and "The Town Mouse and the Country Mouse."

AESOP'S FABLES CONTINUED

Aesop's fables also feature assortments of working men, ordinary people who converse with animals, and men and beast petitioning the gods - usually getting something they didn't ask for in the bargain. Regardless of their characters, however, most of the stories have a clear lesson, many of which echo to this day: "Look before you leap", "Pride comes before a fall", and "Out of the frying pan, into the fire."

Although Aesop's stories were simple and entertaining enough for children to enjoy, they were not originally intended for children. They were meant as rhetoric to win an audience to a point of view. This apparently was Aesop's idea in lecturing citizens of the Greek city-states which he toured. In visits to Corinth and Athens, he sought to reconcile the people of those cities with their rulers' regimes. Hence, the morals of many fables chastised ungrateful, reckless, or impatient men and animals. However, because the stories involved animals, people did not feel they were being reprimanded and they usually accepted the advice without resentment.

According to the poet Phaedrus and other writers, Aesop met his death on one of his many ambassadorial missions. Sent to Delphi by King Croesus to distribute a large amount of gold among the citizens, he became disturbed at the greed of the people there and, instead of gently counseling his hosts, criticized them with his sharp sarcasm. Not only that, he refused to give the Delphians their shares of gold, instead sending the riches back to his king. The enraged Delphians sentenced him to death and executed Aesop by pushing him off a cliff into the sea.

Legend has it that, because of its sin against philosophy, the city of Delphi was plagued by

calamities until its citizens repented. The rest of Greece mourned and honored the great sage in monument and poetry. The famous sculptor Lysippus erected a statue to Aesop's memory in Athens. He lived on in the hearts and minds of all Greeks.

After Aesop's death, his fables were passed on by oral tradition. Students of rhetoric took a great interest in them. Plato states that Socrates spent his time in prison before his execution translating some of Aesop's fables into verse. Demetrius of Phalerum, a student of Aristotle who became the ruler of Athens and librarian at the Great Alexandrian library, compiled the first collection of these fables about 300 B.C. Phaedrus, like Aesop a former slave, translated many of these fables into Latin iambics in the beginning of the 1st century A.D. Babrius, a Greek poet of an uncertain period, recorded a version that would only be recovered over 1500 years later. Many later Latin translators changed the style and the grammar of the fables. Other writers either added or invented fables, or falsified or passed on the most fantastic and absurd stories about Aesop's life.

Aesop's fables seem to have disappeared during the centuries of the Dark Ages. It was not until the beginning of the 14th century that they were rediscovered. A scholarly monk of Constantinople, Maximus Planudes, made a collection of about one hundred and fifty of the fables. Planudes served as a diplomat under the Byzantine Emperor Andronicus the Elder, a patron of learning. His visits to the Western Roman Empire in Venice spread knowledge of Aesop's works. There is doubt about the scrupulousness of Planudes' work, as they contain some anachronisms. He may have altered the collection of Aesop's fables by introducing his own fables or those of contemporary authors,

AESOP'S FABLES CONTINUED

or he may have just passed on the changes made by translators, philosophers, and rhetoricians of the first millennium. But despite these misgivings, modern scholars believe he passed on many of Aesop's tales that were close to the original, and he brought them to the attention of many scholars.

The Fables of Aesop gained their honored place in the Western mind during the Italian Renaissance. Along with Homer, Herodotus, and Thucydides, Aesop was one of the first of the ancient writers translated into Latin by Renaissance scholars. Planudes' collection was printed about 1475, and was translated and published in England in 1485.

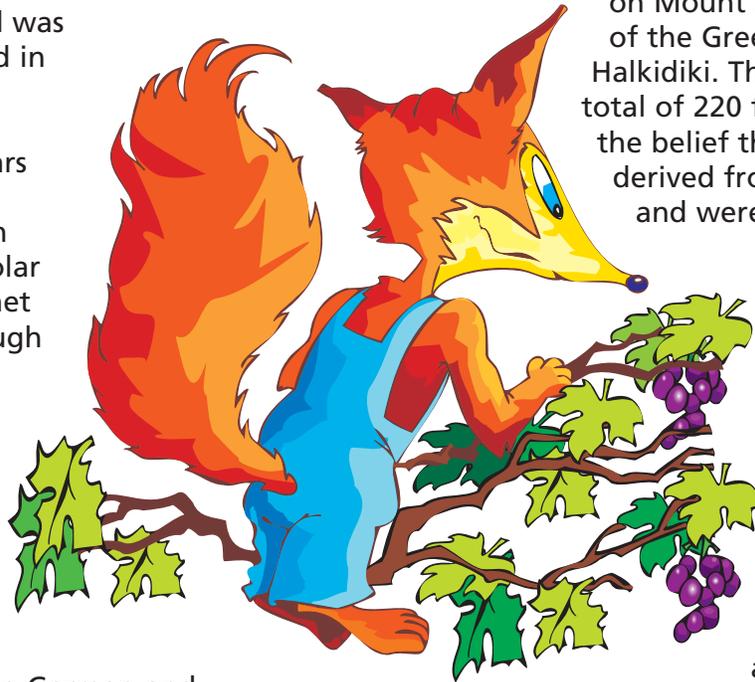

Later Renaissance scholars recovered much of the biographical material on Homer. The French scholar M. Claude Gaspard Bachet de Mezeriac sifted through the works of classical writers to recover what had been said about Aesop's life. He published his *Life of Aesop* in 1632.

Aesop's Fables spread throughout Europe, as they were translated into German and French. Many of the preachers of the Reformation used the fables to satirize and protest the abuses of the Catholic Church.

In 1610, the Swiss Isaac Nicholas Nevelet printed a new edition of Aesop's works, adding to the fables collected by Planudes over 200 previously unpublished fables recovered from the Vatican

Library and from ancient translators. This book furthered Aesop's reputation as one of the greatest moralists and teachers of all time.

Nevelet did a great service to scholarship about Aesop by suggesting that the existing versions of Aesop's Fables could be traced back to the ancient writer Babrius. 18th-century scholars provided evidence that they could not be entirely the work of Aesop because they used words not introduced until hundred of years after Aesop. Further analysis showed the style of the fables to be very close to that of Babrius. Finally, in 1884, researchers found a copy of Babrius' version of Aesop's Fables in a convent on Mount Athos, which is on one of the Greek peninsulas of Halkidiki. This manuscript had a total of 220 fables, and confirmed the belief that current works derived from Babrius' translations and were of ancient origin.

In the centuries since their rediscovery, Aesop's Fables has been the most widely circulated book except for the Bible. It is one of the most popular works of world literature, read by Christian, Jews, Muslims, and pagans alike. Many of the

morals from Aesop's stories have become household phrases, the epitome of common sense and wisdom. While Aesop's life may be half-legend, his fables have become truly legendary.

**POETRY CORNER****Sundown**

Henry Wadsworth Longfellow. (1807 - 1882)
(From *The Belfry of Bruges and Other Poems*, 1845)

THE summer sun is sinking low;
Only the tree-tops redden and glow:
Only the weathercock on the spire
Of the neighboring church is a flame of fire;
All is in shadow below.

O beautiful, awful summer day,
What hast thou given, what taken away?
Life and death, and love and hate,
Homes made happy or desolate,
Hearts made sad or gay!

On the road of life one mile-stone more!
In the book of life one leaf turned o'er!
Like a red seal is the setting sun
On the good and the evil men have done,—
Naught can to-day restore!

Dusk in June

by Sara Teasdale, (1884 - 1933)
From *Rivers to the Sea*, 1915

EVENING, and all the birds
In a chorus of shimmering sound
Are easing their hearts of joy
For miles around.

The air is blue and sweet,
The few first stars are white,—
Oh let me like the birds
Sing before night.!

GOOD WINE CHEAP (AND GOOD FOOD TO GO WITH IT)

By John Grover

With summer on the way, the Northeast and Mid Atlantic States provide many opportunities for day and weekend trips to wine regions. The Finger Lakes of New York is the largest of these areas, and the Chateau Lafayette Reneau, on the East side of Seneca Lake, is at its heart. Its 2001 Seyval-Charonnay blend is one the great finds in New York wine. This white wine starts out with a floral and vanilla nose that switches quickly to crisp apple and smooth Chardonnay through the mouth. A hint of oak complements these tastes. It's so good that the \$6 to \$7 price is absolutely astounding.

Now get out the Lipitor. Double up on the Pravachol. This month we progress from politically incorrect to criminally hedonistic. We have a recipe for the ages, complete with the dreaded butter and heavy cream.

John Grover is a member of Mensa of Northeastern New York. He lives with his wife Sharon in the Hudson Valley in Kinderhook, New York.

Veal Adeline

Ingredients:

12 veal medallions approximately 1 1/2 oz. each
1/4 lb. butter (you probably won't need all this)
all purpose flour
3 oz. sweet Marsala wine
1 cup heavy cream
1 lemon
fresh ground black pepper
garlic powder to taste
12 mushroom caps (go ahead add more)
10 artichoke hearts (halved).

Coat the bottom of a large heavy skillet with butter. Dredge the veal in flour and then place in the hot skillet. Sauté veal medallions until they are golden brown. Add the Marsala wine, pepper and garlic powder and simmer briefly. Add one cup of heavy cream and the juice of 1/2 lemon. Add mushrooms and artichoke halves. Simmer until rich and creamy. Place veal on a serving platter arranging the mushrooms and artichokes on top. Serve with rice or try a garlic couscous.

I hope that you will contact me with your comments and favorite wines at jgrover@berk.com. I will be happy to share them with the broader Mensa group.

Hello everyone.

It is my sad duty to inform our club that the Three Door Restaurant has been sold. The closing will be at the end of this month, June. Until just recently, I was not able to disclose knowledge of the sale per the buyer's orders.

This is the end of a great run for our club, and the beginning of a wonderful new era.

A big Thank You to everyone who spoke to our members, attended the dinners or read the subsequent articles in the Chronicle. We had a great time over the last twelve years. Yes, it has been twelve years. Our first dinner meeting at the Three Door was in October of 1990.

I want to publicly thank Lee Steuber. For all of those twelve years, Lee has been the gracious host, organizer, ticket taker, etc. of the dinners. I merely supplied the space and food. Thank You Lee. You are great to work with and I felt we were an effective team.

So, I will see you all at our next get together. Third Saturdays will never be the same. They are going to be better.

*Thanks Again,
Donald Bobowick*

PUZZLES & QUESTIONS

(Answers may be in next month's Chronicle.)

1. Shivering Sherlock! Whodunit?

One snowy night, Sherlock Holmes was in his house sitting by the fire. All of a sudden, a snowball came crashing through his window, breaking it.

Holmes got up and looked out the window just in time to see three neighborhood kids, who were brothers, run around a corner. Their names were John Crimson, Mark Crimson, and Paul Crimson.

The next day Holmes got a note on his door that read "? Crimson. He broke your window."

Which of the three brothers should Sherlock question about the incident?

2. How many different basic plots are there for stories? How many different themes are there?
3. What were Albert Einstein's greatest mistakes?

ANSWERS TO LAST MONTH'S PUZZLES:

3. Jones and Smith each buy 100 feet of fencing for their gardens. Jones makes a square garden and Smith makes a circular garden. Which one will have a bigger garden?

A: Jones' garden will be 25 feet by 25 feet, or 625 square feet. Smith will make a circle of circumference 100 feet with his fencing. From the circumference, we can calculate the radius of the circle and from the radius we can calculate the area. The circumference of a circle is given by $C = 2 \times 3.14 \times (\text{the radius})$. So the radius of the circle will be $100/(6.28)$, or about 15.92 feet. The area is $3.14 \times (\text{the radius})^2$, or about 795.82 feet, considerably larger than that of the square garden.

THE READING EDGE ^ WHAT'S YOUR READING SPEED?

Do you know what your reading speed is? There is an online test that can give you a quick estimate. The Reading Edge, a Wallingford, CT company, has a test at their website www.the-reading-edge.com. The tests take only a minute and calculate your reading speed instantly. For a more comprehensive test, the company offers a free demo that you can download that will test not only your speed but also your comprehension. The software can be set for different grade levels to test children as well as adults.

The company reports that the average person reads at a speed of between 200-300 words a minute but that people who enjoy reading can read more than 400 words per minute, and that some people can even read well at more than 800 words a minute.

The Reading Edge also offers books, tapes, tele-classes, and personal lessons to help people read faster and more efficiently. For more information, visit their website at www.the-reading-edge.com or contact them at info@the-reading-edge.com
